Since the last IEA in-depth review in 2010, New Zealand has further developed its energy policy, as reflected in its energy strategy to 2021 and new rules for more competitive electricity markets. With its unique resource base, New Zealand is a success story for the development of renewable energy, notably hydro and geothermal, without government subsidies. Geographically isolated, New Zealand has developed robust policies for security of supply. Outside of its largely low-carbon power sector, managing the economy’s energy intensity and greenhouse gas emissions while still remaining competitive.

INTERNATIONAL ENERGY AGENCY

The International Energy Agency (IEA) is an autonomous body which was established in November 1974 within the framework of the Organisation for Economic Co-operation and Development (OECD) to implement an international energy programme. It carries out a comprehensive programme of energy co-operation among twenty-six of the OECD’s thirty member countries.

ORGANISATION OF THE REVIEW REVIEW TEAM

The IEA 2006 in-depth review of the energy policies of New Zealand was undertaken by a team of energy policy specialists drawn from IEA member countries.

Prepared by: Markets Evidence and Insights Ministry of Business, Innovation & Employment PO Box 1473, Wellington 6140 New Zealand Email: energyinfo@mbie.govt.nz. Methanex, one of the country’s largest gas users, increased their production by 16 percent in 2019 after a year of gas supply constraints and maintenance at their sites. Despite shutting down one of their plants for maintenance in 2019, Methanex drove a six percent increase in national industrial sector demand. Choose books together. Track your books.
