Written by bestselling authors Dr. Melvin Morse and Paul Perry, TRANSFORMED BY THE LIGHT proves that those who return from the brink of death are profoundly changed for the better—spiritually and physically—for the rest of their lives, and that these documented changes provide deeper peace and understanding for all who come in contact with them. In 1992, a book was published by Dr. Melvin Morse entitled Transformed by the Light: The Powerful Effect of Near-Death Experiences on People's Lives. It was a follow up to his book Closer to the Light: Learning from the Near-Death Experiences of Children (1991). It was/is his quest to research and interview people who have had NDEs. He fully believes that they happen. Transformation Study. Transformed By the Light book. Read 12 reviews from the world's largest community for readers. The continuation of a comforting, yet scientific, probe into the mysteries of death, which began in Closer to the Light, reveals that people who have had Near Death Experiences manifest a heightened appetite for life. 75,000 first printing. $75,000 ad/promo. Near-Death experiences (NDEs) are for some an intrinsic truth and for others just fantasies and vivid imagination. The book discusses many explanations and proves through a carefully executed study. What I personally found very interesting is the hypothesis that NDEs changes peoples electromagnetic field in such a way that they are transformed and healed. The author believes that this transformation and healing is specifically connected to all those NDEs who saw “the light”. A very interesting book that hopefully will help to acknowledge this phenomenon. I believe it is especially important th Transformed by the Light: Life after Near-Death Experiences. Sydney, Australia: Bantam. Includes near-death experiences in children.Â Examining the effects of the near-death phenomenon and what survivors have come to believe about life, a collection of case stories offers their messages of hope, peace, joy, and life after life. van Lommel, P. (2010). Consciousness Beyond Life: The science of the near-death experience. Scientific evidence that the near-death phenomenon is an authentic experience demonstrating that consciousness can be experienced separate from the body. van Lommel, P., van Wees, R., Meyers, V., & Elfferich, I. (Article, 2001). Near-death experience in survivors of cardiac arrest: A prospective study in the Ne
