A Study of Role of News Agencies in News Dissemination in National Capital Region Synopsis / Research Proposal. Submitted to the, Shri Jagdish Prasad Jhabarmal Tibrewala University For the Degree, Doctor of Philosophy, Journalism & Mass Communication. Rahul Sharma. Registration No. JJT/18710328 Under the guidance of Dr. R. N. Malviya Department of Humanities. Shri Jagdish Prasad Jhabarmal Tibrewala University, Vidyanagari, Jhunjhunu, Jajasthan -. Year 2012. World news agencies - the leading news sources of foreign media. The role of news agencies in the creation of a global information space. "Associated Press" - "AP", The largest U.S. Information Agency. "United Press International" - "UPI", The second-largest U.S. Information Agency. National agencies have extended the area of such coverage by gathering and distributing stock-market quotations, sports results, and election reports. A few agencies have extended their service to include worldwide news. The service has grown to include news interpretation, special columns, news photographs, audiotape recordings for radio broadcast, and often videotape or motion-picture film for television news reports. So-called "fake news" has renewed concerns about the prevalence and effects of misinformation in political campaigns. Given the potential for widespread dissemination of this material, we examine the individual-level characteristics associated with sharing false articles during the 2016 U.S. presidential campaign. To do so, we uniquely link an original survey with respondents’ sharing activity as recorded in Facebook profile data.
